

Hyunjin Park

Department of Artificial Intelligence, Yonsei University, Republic of Korea
E-mail: meat124@yonsei.ac.kr | Homepage: meat124.github.io

Research Interests: *Robot Learning, Robotic Manipulation, Humanoid*

Education

Yonsei University, Seoul, Republic of Korea

Mar 2025 – Feb 2027 (Expected)

- M.S., Artificial Intelligence, Advisor: Prof. Jongeun Choi

Yonsei University, Seoul, Republic of Korea

Mar 2018 – Feb 2025

- B.S., Mechanical Engineering, Advisor: Prof. Jongeun Choi

Publications

CoHuB: A Simulation Benchmark for Multi-Humanoid Collaboration

Sep 2026

Hyunjin Park*[†], Jebeom Chae*, Minwoo Park*, Sunghyun Park, Hanjun Yoo, Seoyeon Choi, Soochul Yoo, Joohwan Seo, Sarmad Idrees, Jae-Sang Hyun, Jongmin Lee, Roberto Horowitz, Youngwoon Lee, Jongeun Choi (*co-first author, [†]project lead)
Robot Learning Workshop @ NeurIPS 2026 (accepted), as “CoHuB: A Collaborative Humanoid Loco-Manipulation Benchmark”
Extended version: arXiv preprint, under review [[arXiv](#), [Project Page](#)]

Selected Honors and Awards

1st place (Grand Prize), National ICT Smart Device Competition, Ministry of Science and ICT

Aug 2024

- Award by the Minister of Science and ICT
- Developed CARTRASCHE, an autonomous manufacturing-assistant mobile robot with a rotating shelf system
- Implemented SLAM navigation & human-following in ROS1 with Python/C++ [[News](#), [Project Page](#), [Video](#)]

1st place (Grand Prize), 2024 Yonsei University Student Startup Competition

Nov 2024

- Award by the Startup Support Foundation, Yonsei University [[Announcement](#)]

2nd place, Yonsei University Class Achievement and Idea Contest

Aug 2024

- Developed a mobile robot with autonomous navigation for industry

Research Experience

Machine Learning and Control Systems Laboratory, Yonsei University

Mar 2025 – Present

Graduate Researcher (M.S. Student). Supervisor: Prof. Jongeun Choi

- Led **CoHuB** as project lead, a multi-humanoid collaboration benchmark with 10 tasks built on Isaac Lab
- Built a synchronized multi-operator VR teleop pipeline and collected 600 collaborative demonstrations
- Benchmarked 8 policies incl. ACT, DP, multi-agent IL, VLAs ($\pi 0.5$, GR00T N1.7) and a World Action Model
- Collected real-robot demos on the Rainbow Robotics RB-Y1 and trained/evaluated VLA policies on them

Machine Learning and Control Systems Laboratory, Yonsei University

Jun 2023 – Feb 2025

Undergraduate Intern. Supervisor: Prof. Jongeun Choi

- Contributed to research on robot arm manipulation using “Diffusion Policy” with force/torque data
- Contributed to research on mobile robot path planning using Deep-RL with parameter adaptive control

Extracurricular Activities and Leadership

YAI, Artificial Intelligence Club, Yonsei University

Jul 2023 – Dec 2024

- Led the Robot Learning Team, actively studying and analyzing research papers on Robot Learning
- Participated in Computer Vision Team, actively studying and analyzing research papers on Computer Vision
- Contributed to the “3D Diffuser Actor” model on simulation framework for manipulation task project
- Contributed to the “Korean Sign Language Video AI Translation” project

Morgorithm, Algorithm Problem Solving Club, Yonsei University

Jan 2023 – Jan 2024

- Studied algorithms and participated in algorithm problem-solving competitions

SoccerPub, Sinchon Intercollegiate Football Supporters’ Club — President

Jul 2020 – Dec 2023

- Served as **President** for 3.5 years, leading the club and organizing regular football match-viewing events

Skills Summary

Programming Languages: Python, C/C++ | **Languages:** Korean (Native), English (Fluent, OPIc IH)

Frameworks/Tools: Linux, ROS1&2, Docker, Git, PyTorch, Isaac Sim, Isaac Lab, MuJoCo, Creo, Ansys
